Subject: Re: Latest Seralini Study

It is not a subscription journal. Cost is \$1500 when accepted.

John Entine is working on an analysis of the paper based on the Monsanto remarks. He wants to know if the journal is 'pay to pub' as John's note says below. Can someone confirm that point?

Eric

Tom and Melissa,

A heads up. Seralini has a new publication soon to appear in a pay to pub called Biomed Research International Magazine. David's initial assessment is below and a response is in the works. As David states, this is a typical Seralini publication demonstrating harm to cells in vitro following application of glyphosate formulations containing surfactants.

I will keep you posted.

Regards,

John
