Kate –

As we discussed, I am passing along a background summary deck; the deposition (sworn witness testimony) of the IARC Chair, Dr. Aaron Blair, and a number of additional documents will follow. We are sending these exclusively to you for your review. The deposition and other documents clearly show that Dr. Blair concealed information from the IARC working group that showed no link between glyphosate and cancer. This concealed data undermines IARC's conclusion.

Please treat the summary deck as background information – but the quote from our VP of Strategy, Scott Partridge, is on the record. If it would be helpful to speak with Scott on the record as you're developing a story, I can arrange that as well.

I'll be sending the documents in a three separate emails because some of the files are quite large. Please confirm that you do receive all three additional emails.

Let's plan to talk again later today or tomorrow to see if you have questions or need additional information. I would just ask that once you've reviewed the documents, you please let me know if you'll be pursuing this story. We think this is vitally important information that needs to be reported.

Thank you, Kate.

Sam
