Does this ca \$10 cost belong with the GGTT? If so we will need a cost centre number.

Parry's fee is agreed to be 600£/day. I guess he will need max. 10 days to digest all the paperwork, make a report and spend one day with Larry Kier. That makes it 6000£.

How much will it be?

The results are now needed to persuade him that nothing to do with Glyphosate is mutagenic. The ECCO Mammalian tox review came out with this conclusion - we hear.

[REDACTED],  
All documents have been shipped to Parry and he confirmed receipt of them. He is currently reviewing all the documents and it will take a while before he will be ready with a first draft of a review. I'll check on him again in June.

This work will consume quite a bit of his time and although he is not expensive at all it will cost us money. Where can I find this money because I am afraid that I cannot pay for it from my budget.

Regards, [REDACTED]
