To the best of my knowledge, the pediatric manuscript has been submitted to the Am J Psychiatry. We signed off on the submission at Forest in mid-November and forwarded the submission package to the authors, who were to send it to the journal. I will check and confirm that the package has indeed been submitted.

Obviously, we are interested in seeing the draft publication of the results from the Lundbeck pediatric study. Please forward the manuscript as soon as it is ready.

Unfortunately, I will not be at ACNP. I have moved into a new role at Forest (Director, Medical Affairs for Internal Medicine). As such, I am no longer involved with our CNS products. However, I am continuing to handle any remaining citalopram-related material (as there are relatively few of us left who have any history with this project). Thus, any citalopram-related materials should continue to be forwarded to me.

Hope all is well with you.

Best regards,

Bill

Subject: Publications

Bill,

Hope this finds you well.

I just wanted to check on the status for the Wagner pediatric manuscript. Last I heard Forest was discussing journals, but I assume that it has been submitted by now?

The reason I ask is that investigators in the Lundbeck sponsored study seem eager to submit a manuscript on their study (they are working on it - we have not yet seen any draft) and I wanted to make sure that the positive data are in the public domain before their negative data get out. On the same note I am pushing submission on the observational safety study from South Africa, the one we presented as posters.

Kind regards

Redacted,

PS See you at ACNP?
