David,

Rumors are just that--rumors. First of all, I will be in Japan all next week. Letters to the editor can continue to come in lets say until October 15, 2012. The more the better.

Wally

Wally,

It is my understanding that at this point you should have at least half a dozen third party expert scientist/toxicologist letters expressing significant shortcomings of the paper in question (spherix and/or Comcast email addresses). Monsanto now also intends to submit a rather substantial letter to the editor this week, focused on the science, or lack thereof. In addition, the European Glyphosate Task force may also submit a glyphosate focused letter to the Editor. However, there appears to be rumors that you require letters to the Editor TODAY.

Please let me know the time constraints you may be under and I will do meet best to meet your time line.

Regards,

David Saltmiras, Ph.D., D.A.B.T.
Toxicology Manager
Regulatory Product Safety Center
